

Bradshaw Bariatric Beds

The Bradshaw beds are specially designed to cater safely for patients weighing up to 318kg (50st) in the community, nursing and residential care environments.

- ▶ Robust and sturdy electrically operated 4 section profiling care bed, designed specifically for plus size patients
- ▶ The Auto contour feature allows simultaneous backrest and knee-break adjustments, preventing patients sliding down the bed
- ▶ The side rails provide additional safety with a two-stage unlocking mechanism which reduces the potential risk of accidental release
- ▶ Attractive domestic appearance with high quality wooden head and footboards and full length integral wooden side rails

Bed Width: **135cm**
 Bed Length: **224.5cm**
