

OPTIMAL POSITIONING AND SUPPORT FOR EVERY INDIVIDUAL MANUAL WHEELCHAIR USER

PRESSURE INJURY TREATMENT PLAN

- ▲ Optimal positioning through a combination of SmartCells and Strap back
- ▲ Offloading the spinal column
- ▲ Dynamically moulds to the individual's back contours

The Vicair Anatomic back is a highly comfortable universal back support, that enables optimal positioning and high quality pressure redistribution. Ready for use, as it dynamically adjusts to the contours of the user's back, but also allowing a large variety of individual adjustments. Adjustments can be made with the client still leaning against the cushion. The lightweight cushion is used in combination with the easy-install Vicair Strap back and can be used in wheelchairs without a back support plate. It is extremely suitable to use with (extreme) spine deformities. The Anatomic back follows asymmetric body contours and keeps you safe and stable.
