

STREETJET QUICK REFERENCE GUIDE

Designed to address customer feedback on current powered add-on bikes:

- Clamping can be difficult
- Weight left on the chair
- Minimal styling options

Feature	Benefit
One Touch Clamps	Easy to use, accessible to more users, no weight left on the chair
Integrated stand	No heavy lifting during the docking process
Spring loaded steering column	Keeps the wheel and steering column aligned in a central position, helping with the docking process and riding performance
Styling options	20 fork/frame colours gives users the ability to match StreetJet to their wheelchair
14Ah battery	Delivers up to 50km range
High torque motor	Shorter gearing in the motor allows StreetJet to deliver more torque, helping users overcome obstacles on their journey
LED headlight	Ensures greater visibility during foggy days and dark nights
Intuitive controls	StreetJet's controls are intuitive to use, even for new users
USB charging port	Ride without fear. The integrated USB port allows users to charge their devices whilst on their journey
