YOMPER+

Power add-on for manual wheelchair

MADE IN FRANCE

here

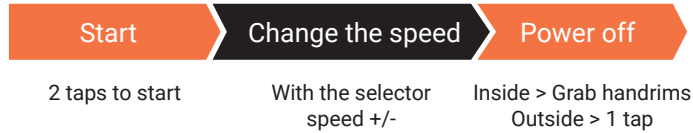

IT PUSHES YOU RIDE

EASY TO DRIVE

Intuitive and reassuring

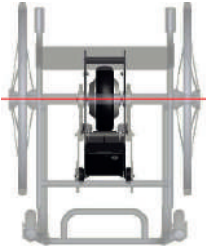

- ▶ I steer my wheelchair with the handrims.
- ▶ I brake my wheelchair with the handrims (indoor mode).
- ▶ I pilot thanks to a simple wireless controller.
- ▶ I start smoothly and safely.

Designed for perfect fit and function

The Yomper+ is barely noticeable and remains easy to handle at all times.

The combination of its innovative positioning in-line with the rear axle of your wheelchair and its freewheeling capability allows you to perfectly maintain the dynamics of your wheelchair.

EVERYWHERE

hi

Small but powerful

Thanks to a powerful 250W motor capable of speeds up to 10km/h, it facilitates your daily trips.

Spare your shoulders and arms even when traveling in difficult conditions (slopes, grass, gravel...).

Slope 15%

Travel with your Yomper+

▶ Compact and lightweight (5.8kg), it will be your travel companion thanks to its included carrying case.

▶ Energy efficient, it has a range of up to 35km.

▶ Two small wheels (at the front of your Yomper) and raised handle allow you to easily attach and/or detach it from your wheelchair.

International Air Transport Association (IATA) approved

FOR YOU

here

Adapts to your ride

▶ I can configure the Yomper+ according to my strength and my mobility requirements.

▶ The 5 speeds per mode (indoor or outdoor) allows me to adapt my speed to my environment.

Keep your wheelchair

The Yomper+ is compatible with most of rigid or foldable chairs. The folding chair remains foldable thanks to its retractable support!

hello
